

# EOS C700 EOS C700 PL EOS C700 GS PL

4.5K

## Our Flagship Cinema EOS Camera

Canon's new EOS C700 Super35 format camera is designed to be a flexible "A" camera for various types of shooting scenarios. The EOS C700 features both internal 4K ProRes and XF-AVC recording. With the optional 4K Codex CDX-3150 recorder, the EOS C700 is capable of recording uncompressed RAW up to 120 frames per second. As Canon's flagship cinema camera, the EOS C700 features the choice of one of two new Super 35mm CMOS sensors. With three models to choose from, users can choose the best tool for their shooting requirements. The EOS C700 is available in both EF and PL versions and features a pixel resolution up to 4.5K, a dynamic range of 15 stops and Dual Pixel CMOS AF. The PL mount only EOS C700 GS PL features 14 stops of dynamic range, up to 4K resolution and a Global Shutter.
