Driver Mario Marcao

Sapato / Shoes 40

Camisa / Shirt 42

Calça / Pants 44

Has a long time relation with the automotive universe. Started his career racing karts at young age and evolved to club racing after getting his first Mazda Mx-5. Later on 2007, Mario added a classic BMW 3.0 CSL and a Porsche 911 to his collection (cars he still keeps), racing both of them. In 2013 Mario was invited to join a professional racing team driving a BMW Gp2 (for the national championship) and a classic Mini, as well as some other one-off races (Fiat Punto GT).

Owning a +500bhp Porsche 911 Turbo and a 326bhp BMW 535d as daily drivers, Mario is no stranger to powerful cars driven in racing environment, participating in several supercar events (Cars and Coffee, etc...).

Professionally, Mario is a precision-oriented helicopter pilot, which led him to be a member (and 2009 Flight Leader) of the Portuguese Air Force aerobatic team "Rotores de Portugal", one of only five in the world. This experience got him very used to fly extremely close to other helicopters (1 meter) in front of thousands of spectators. Besides that, Mario flew all types of missions, specializing in aerial filming. For instance, he broadcasted live MotoGP for 3 years for Dorna (Portugal and Spain).
